A Solid-based Architecture for Decentralised Interoperable Location Data

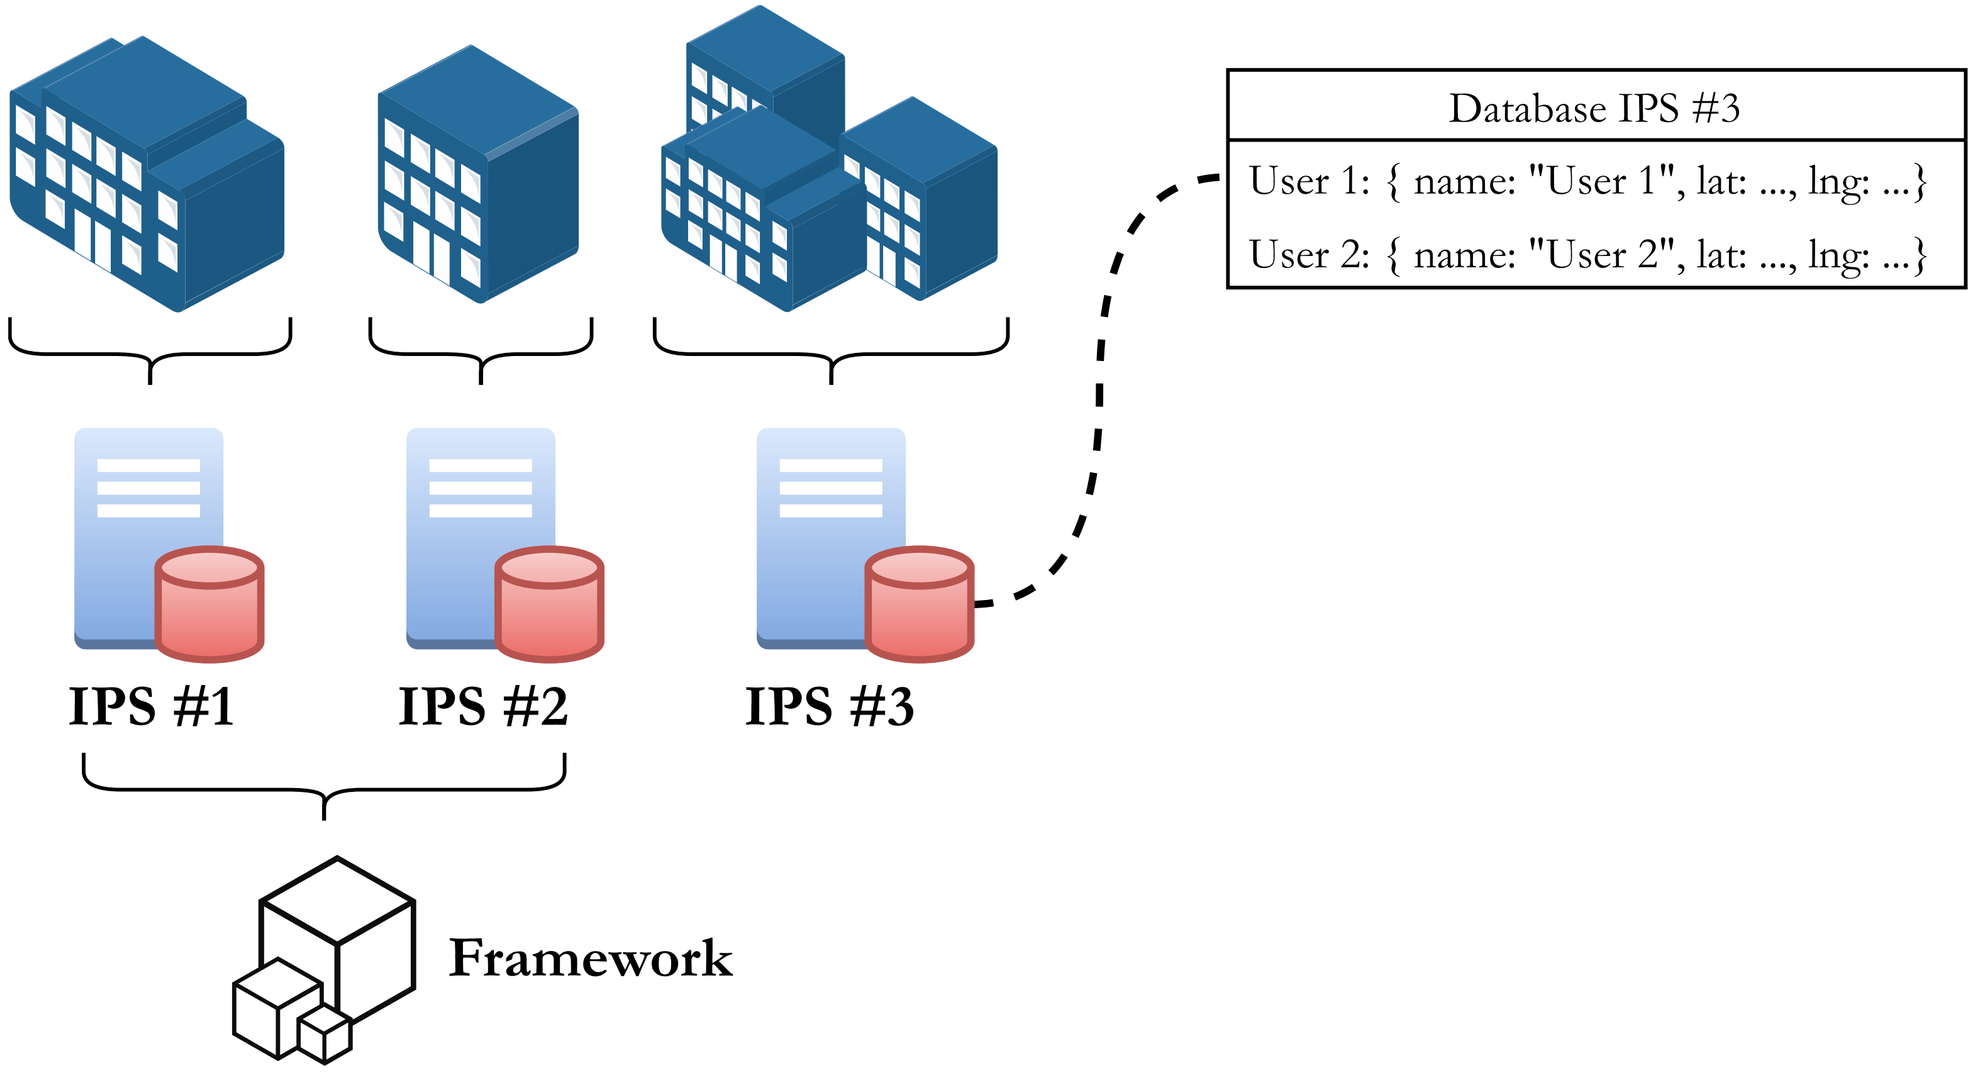
Maxim Van de Wynckel and Beat Signer

Web & Information Systems Engineering Lab
Vrije Universiteit Brussel

VRIJE UNIVERSITEIT BRUSSEL

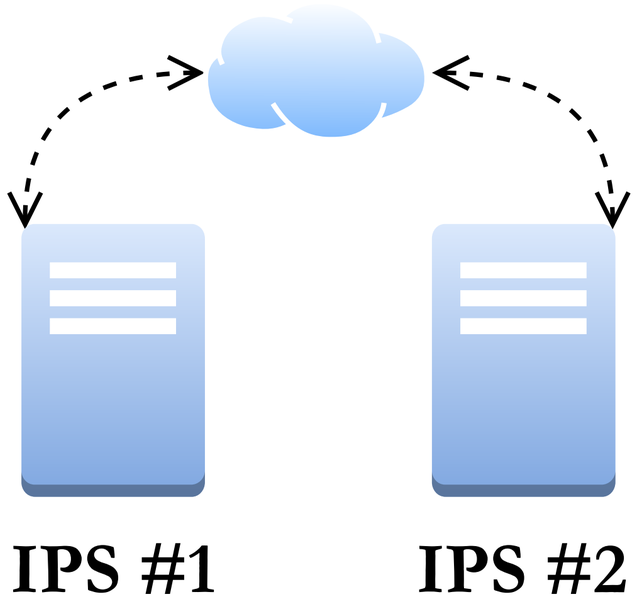
WEB & INFORMATION SYSTEMS ENGINEERING

Current Indoor Positioning Systems (IPS)

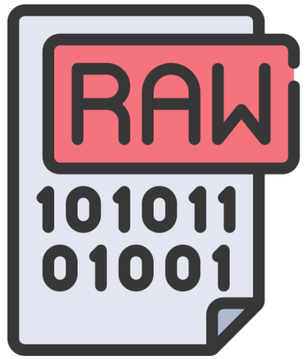


Problems With Current IPSs

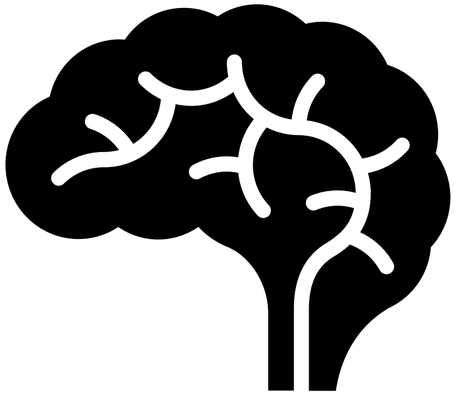
1. Users not in **control** of their **data**
2. No **interoperability** between positioning **systems** and **applications**



Accessibility



Readability



Understandability

```

Conclusion and Future Work

- Novel architecture for **decentralising** location **data**
  - **User** remains **in control** of their data
- **Interoperability** between systems and applications
  - **Handover** of tracking between systems
  - Single **navigation** application
  - High-level decision fusion
- **Vocabulary extensible** with additional semantics
