

POSO: A Generic Positioning System Ontology

Maxim Van de Wynckel and Beat Signer

*Web & Information Systems Engineering Lab
Vrije Universiteit Brussel*

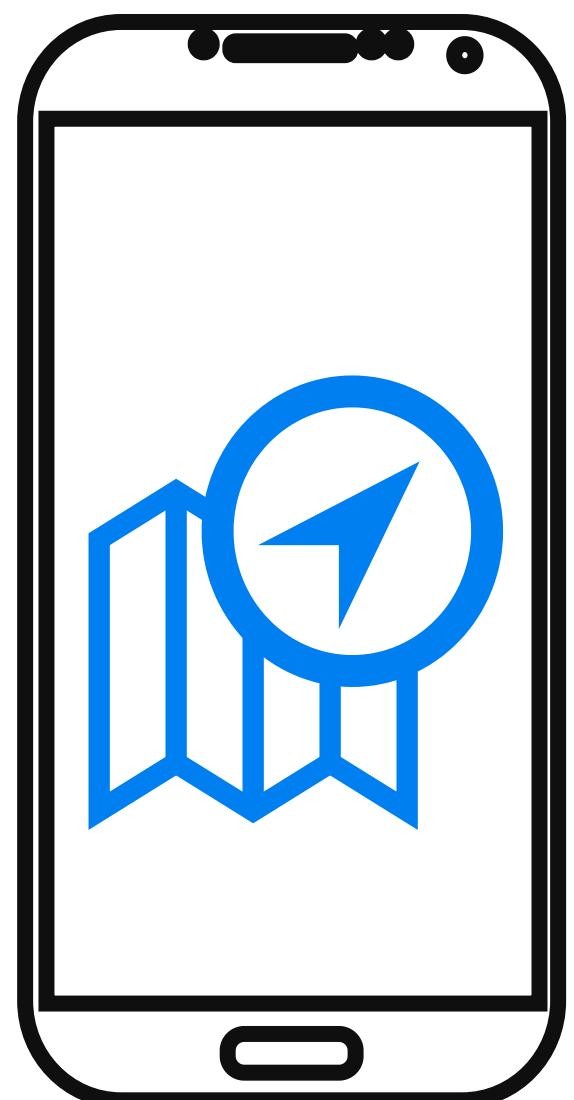

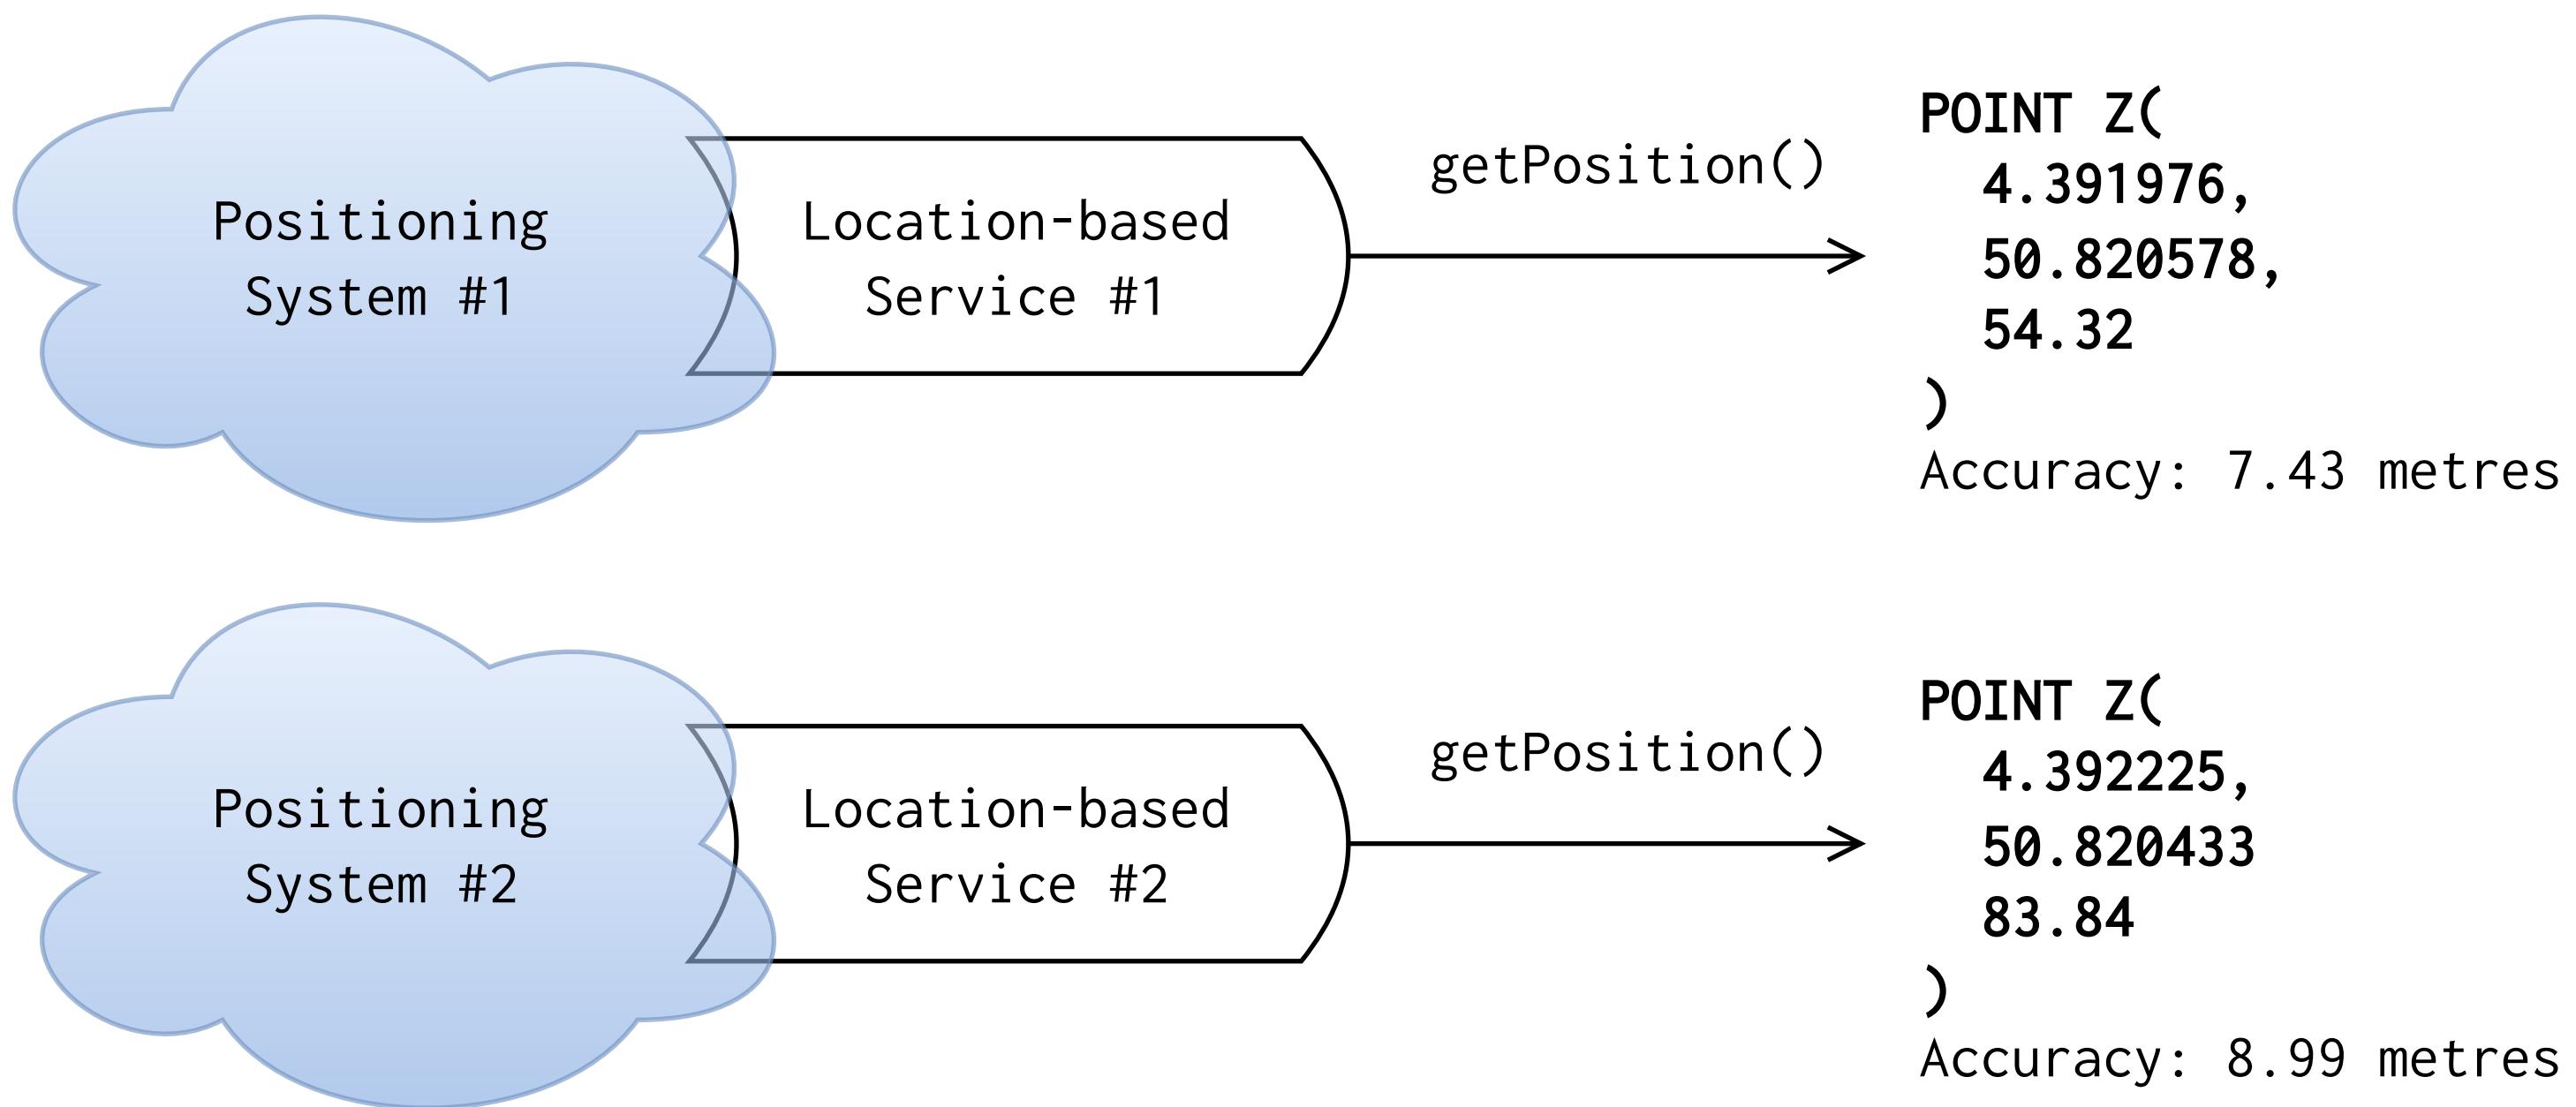

POsitioning System Ontology

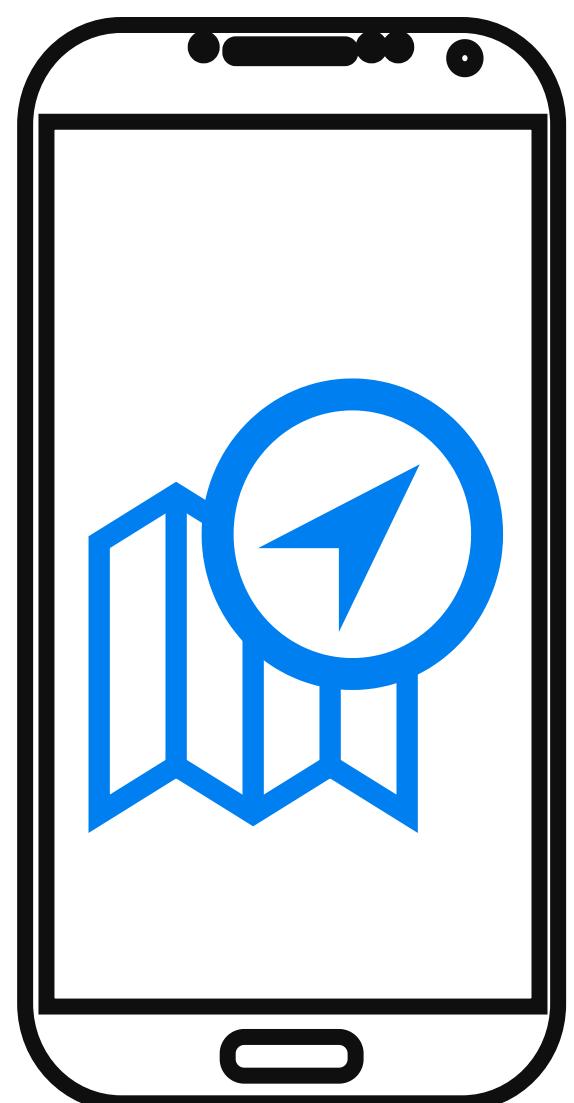

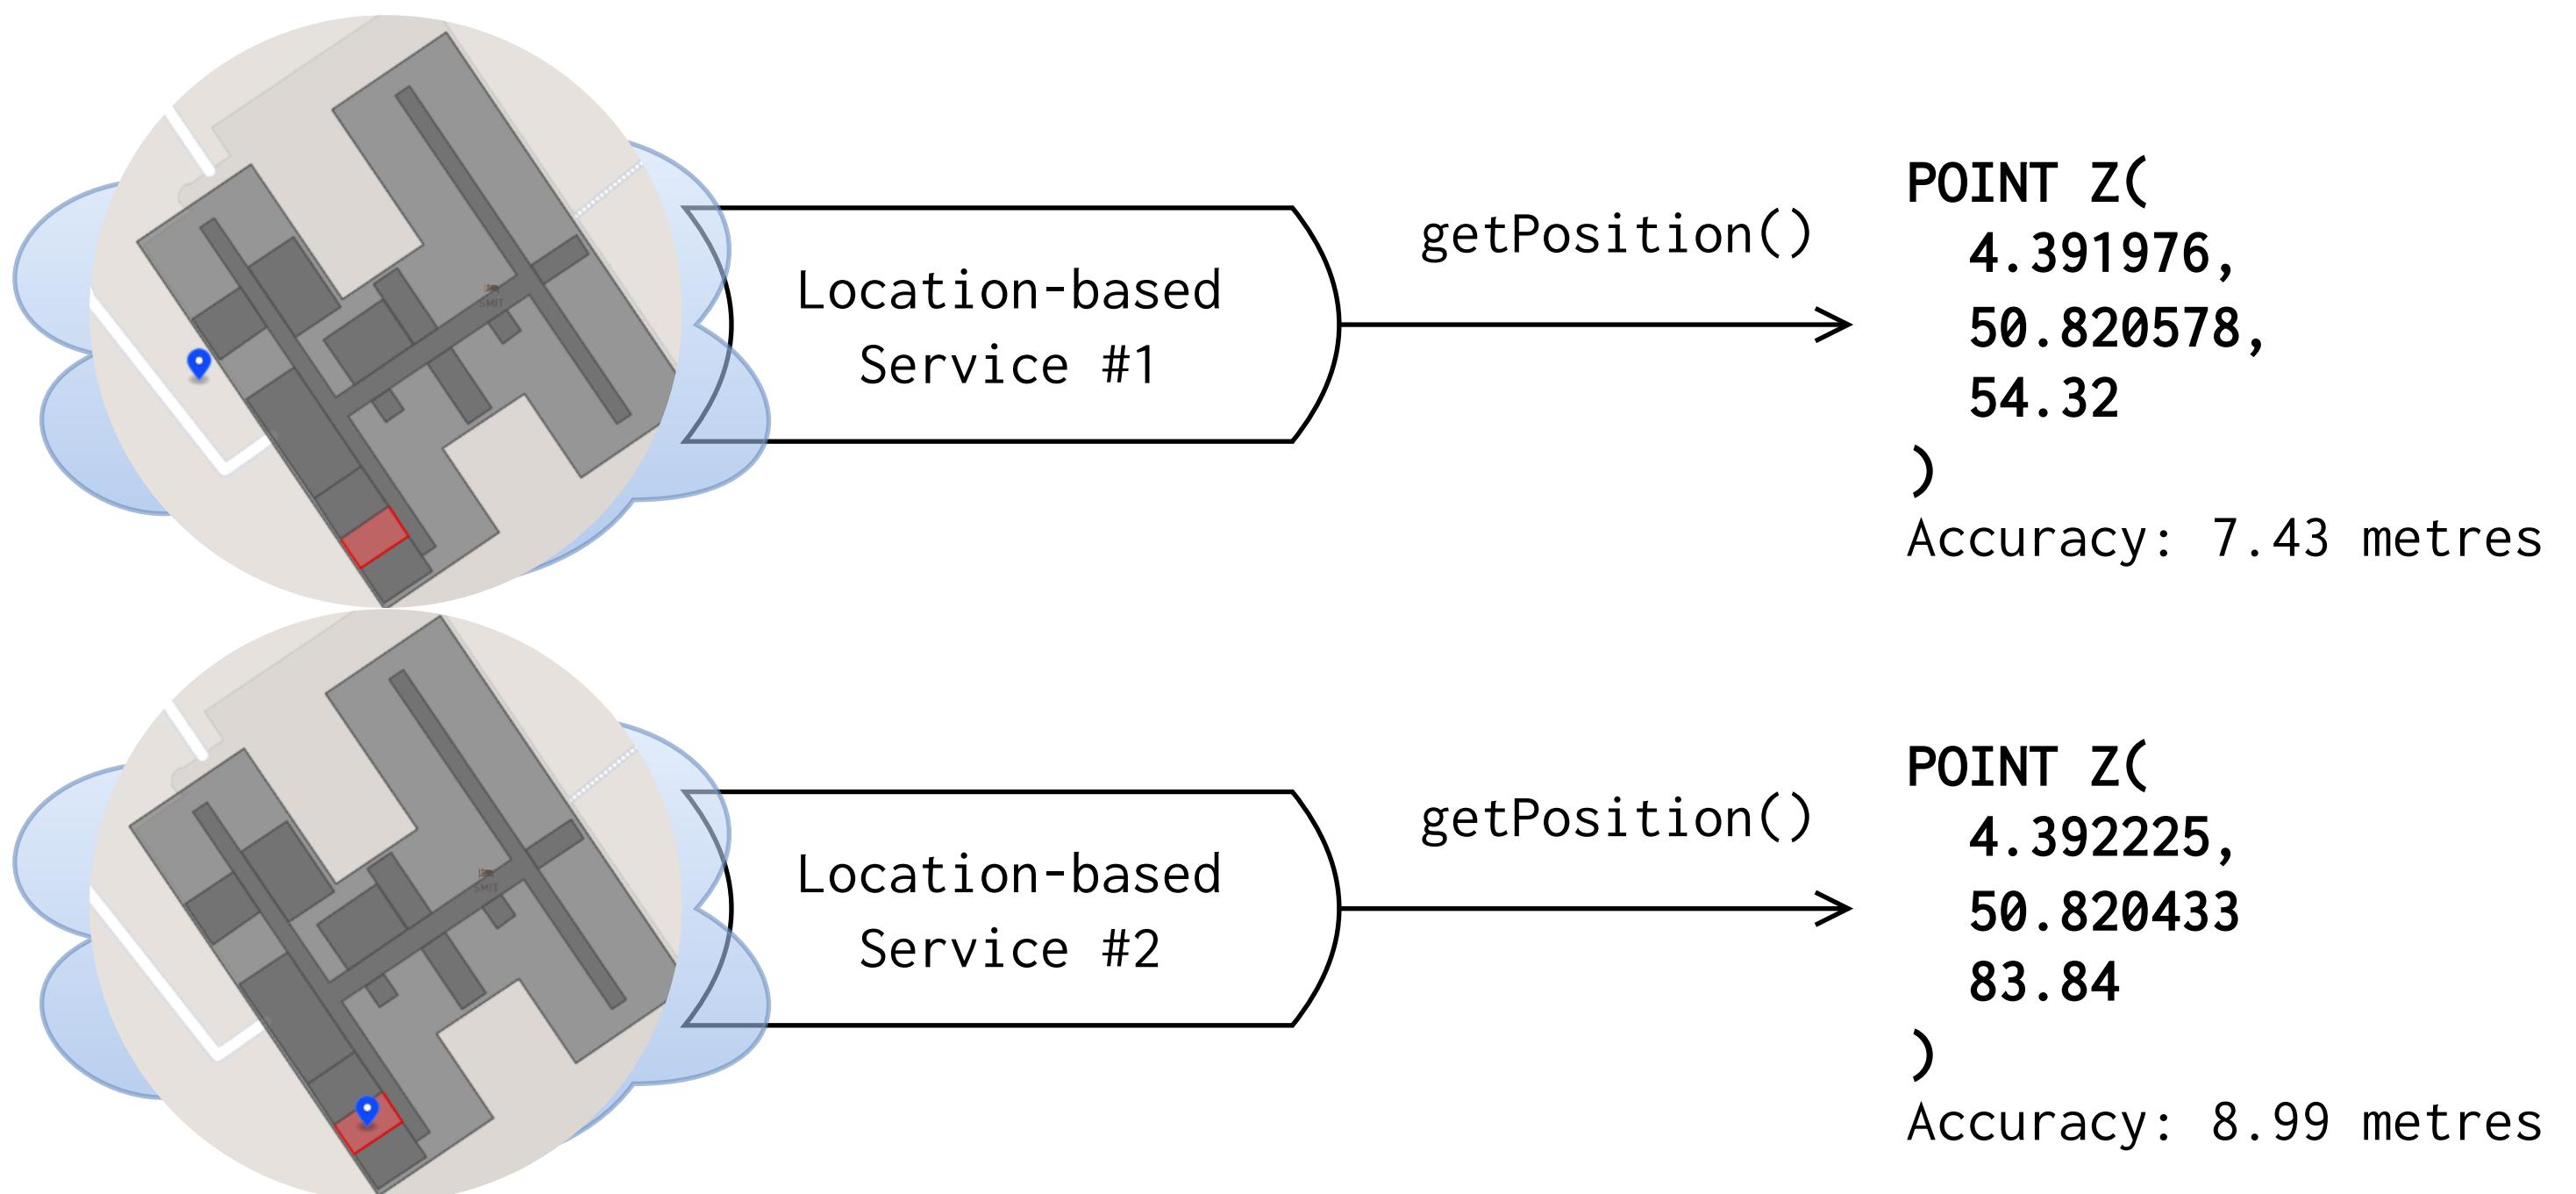

Introduction

*POSO provides the terminology needed to describe different **types of positioning systems**, the **algorithms** and technologies that they implement and the **data** that is produced by these systems.*

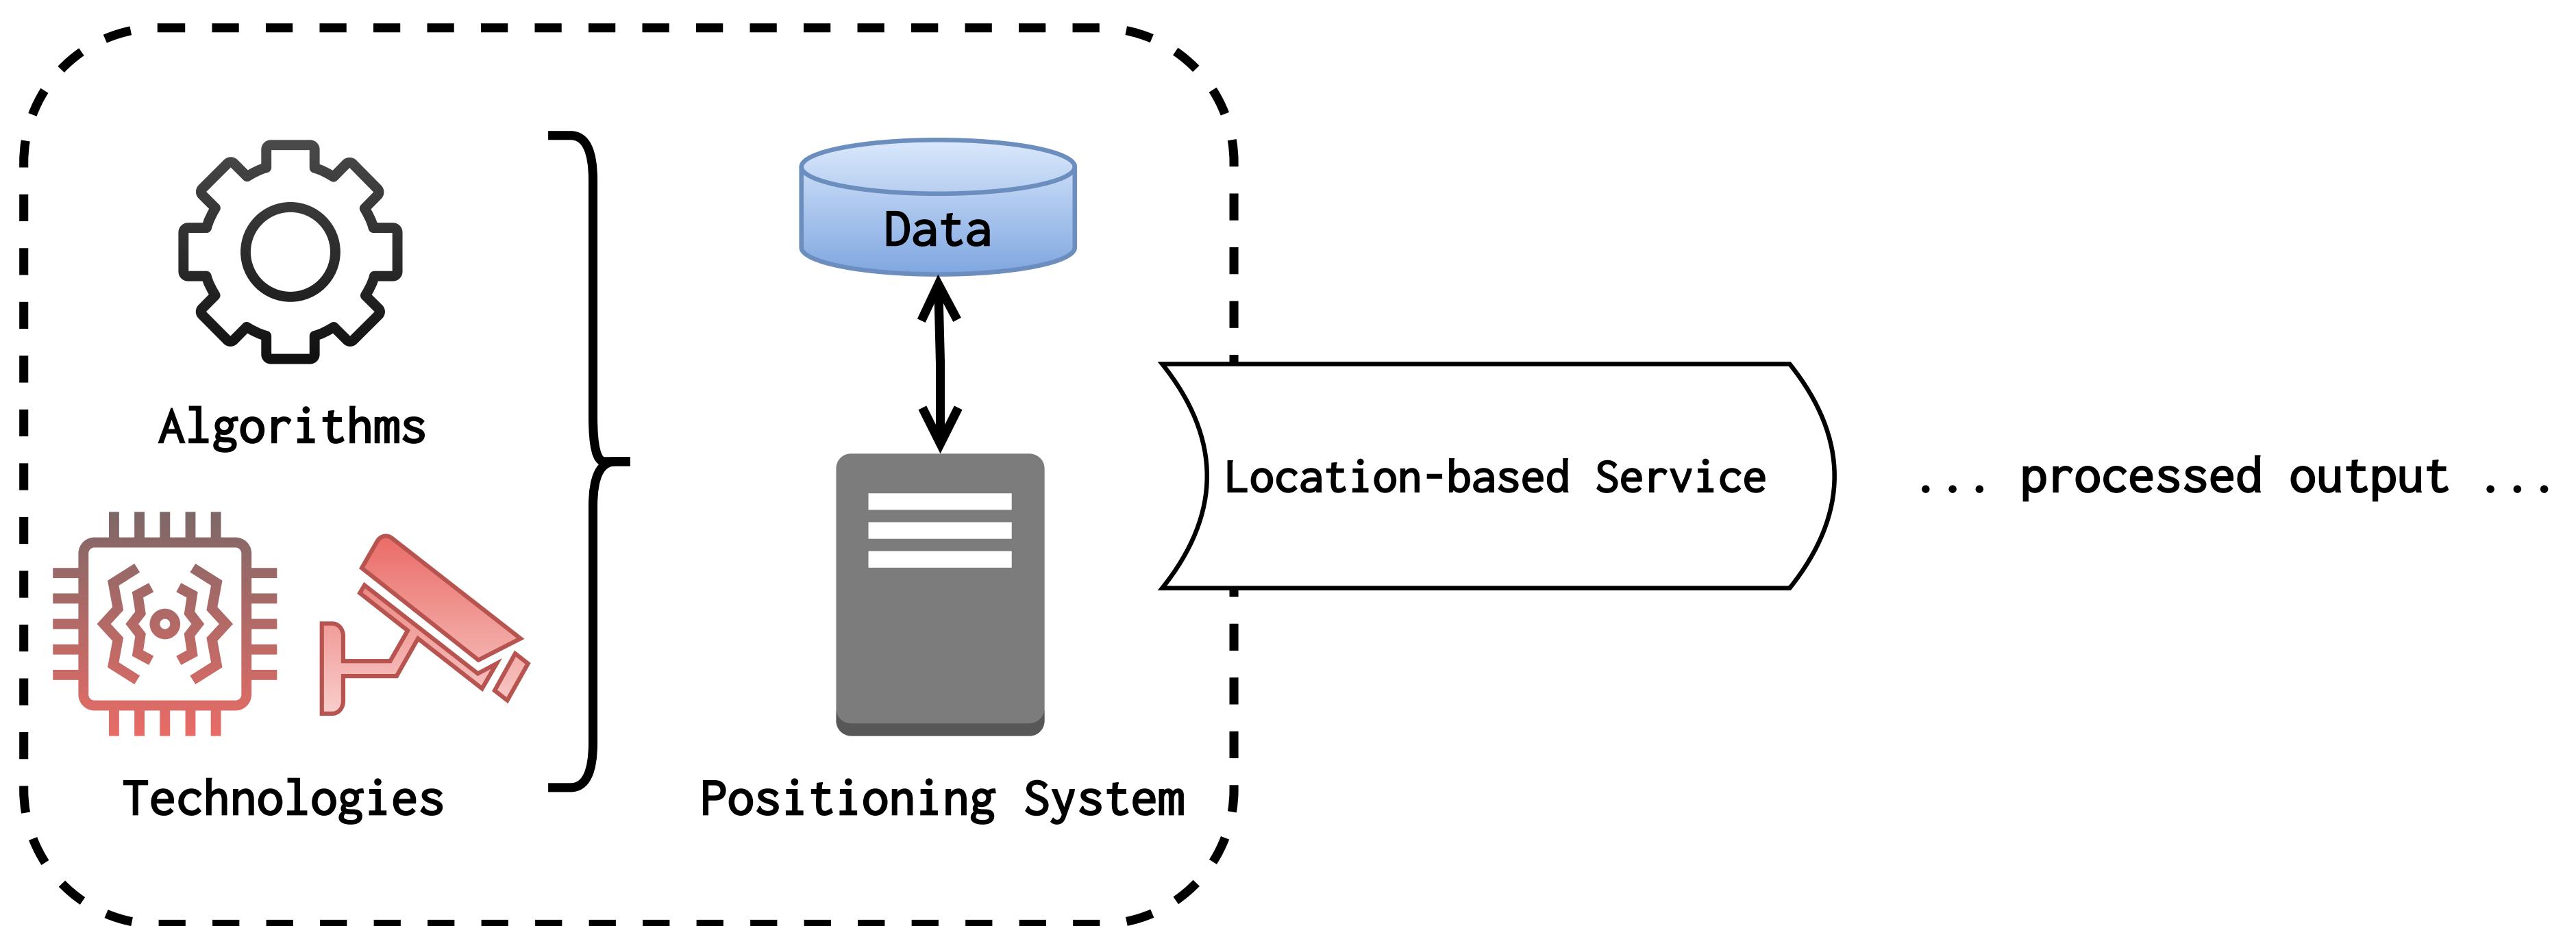

Location-based Services

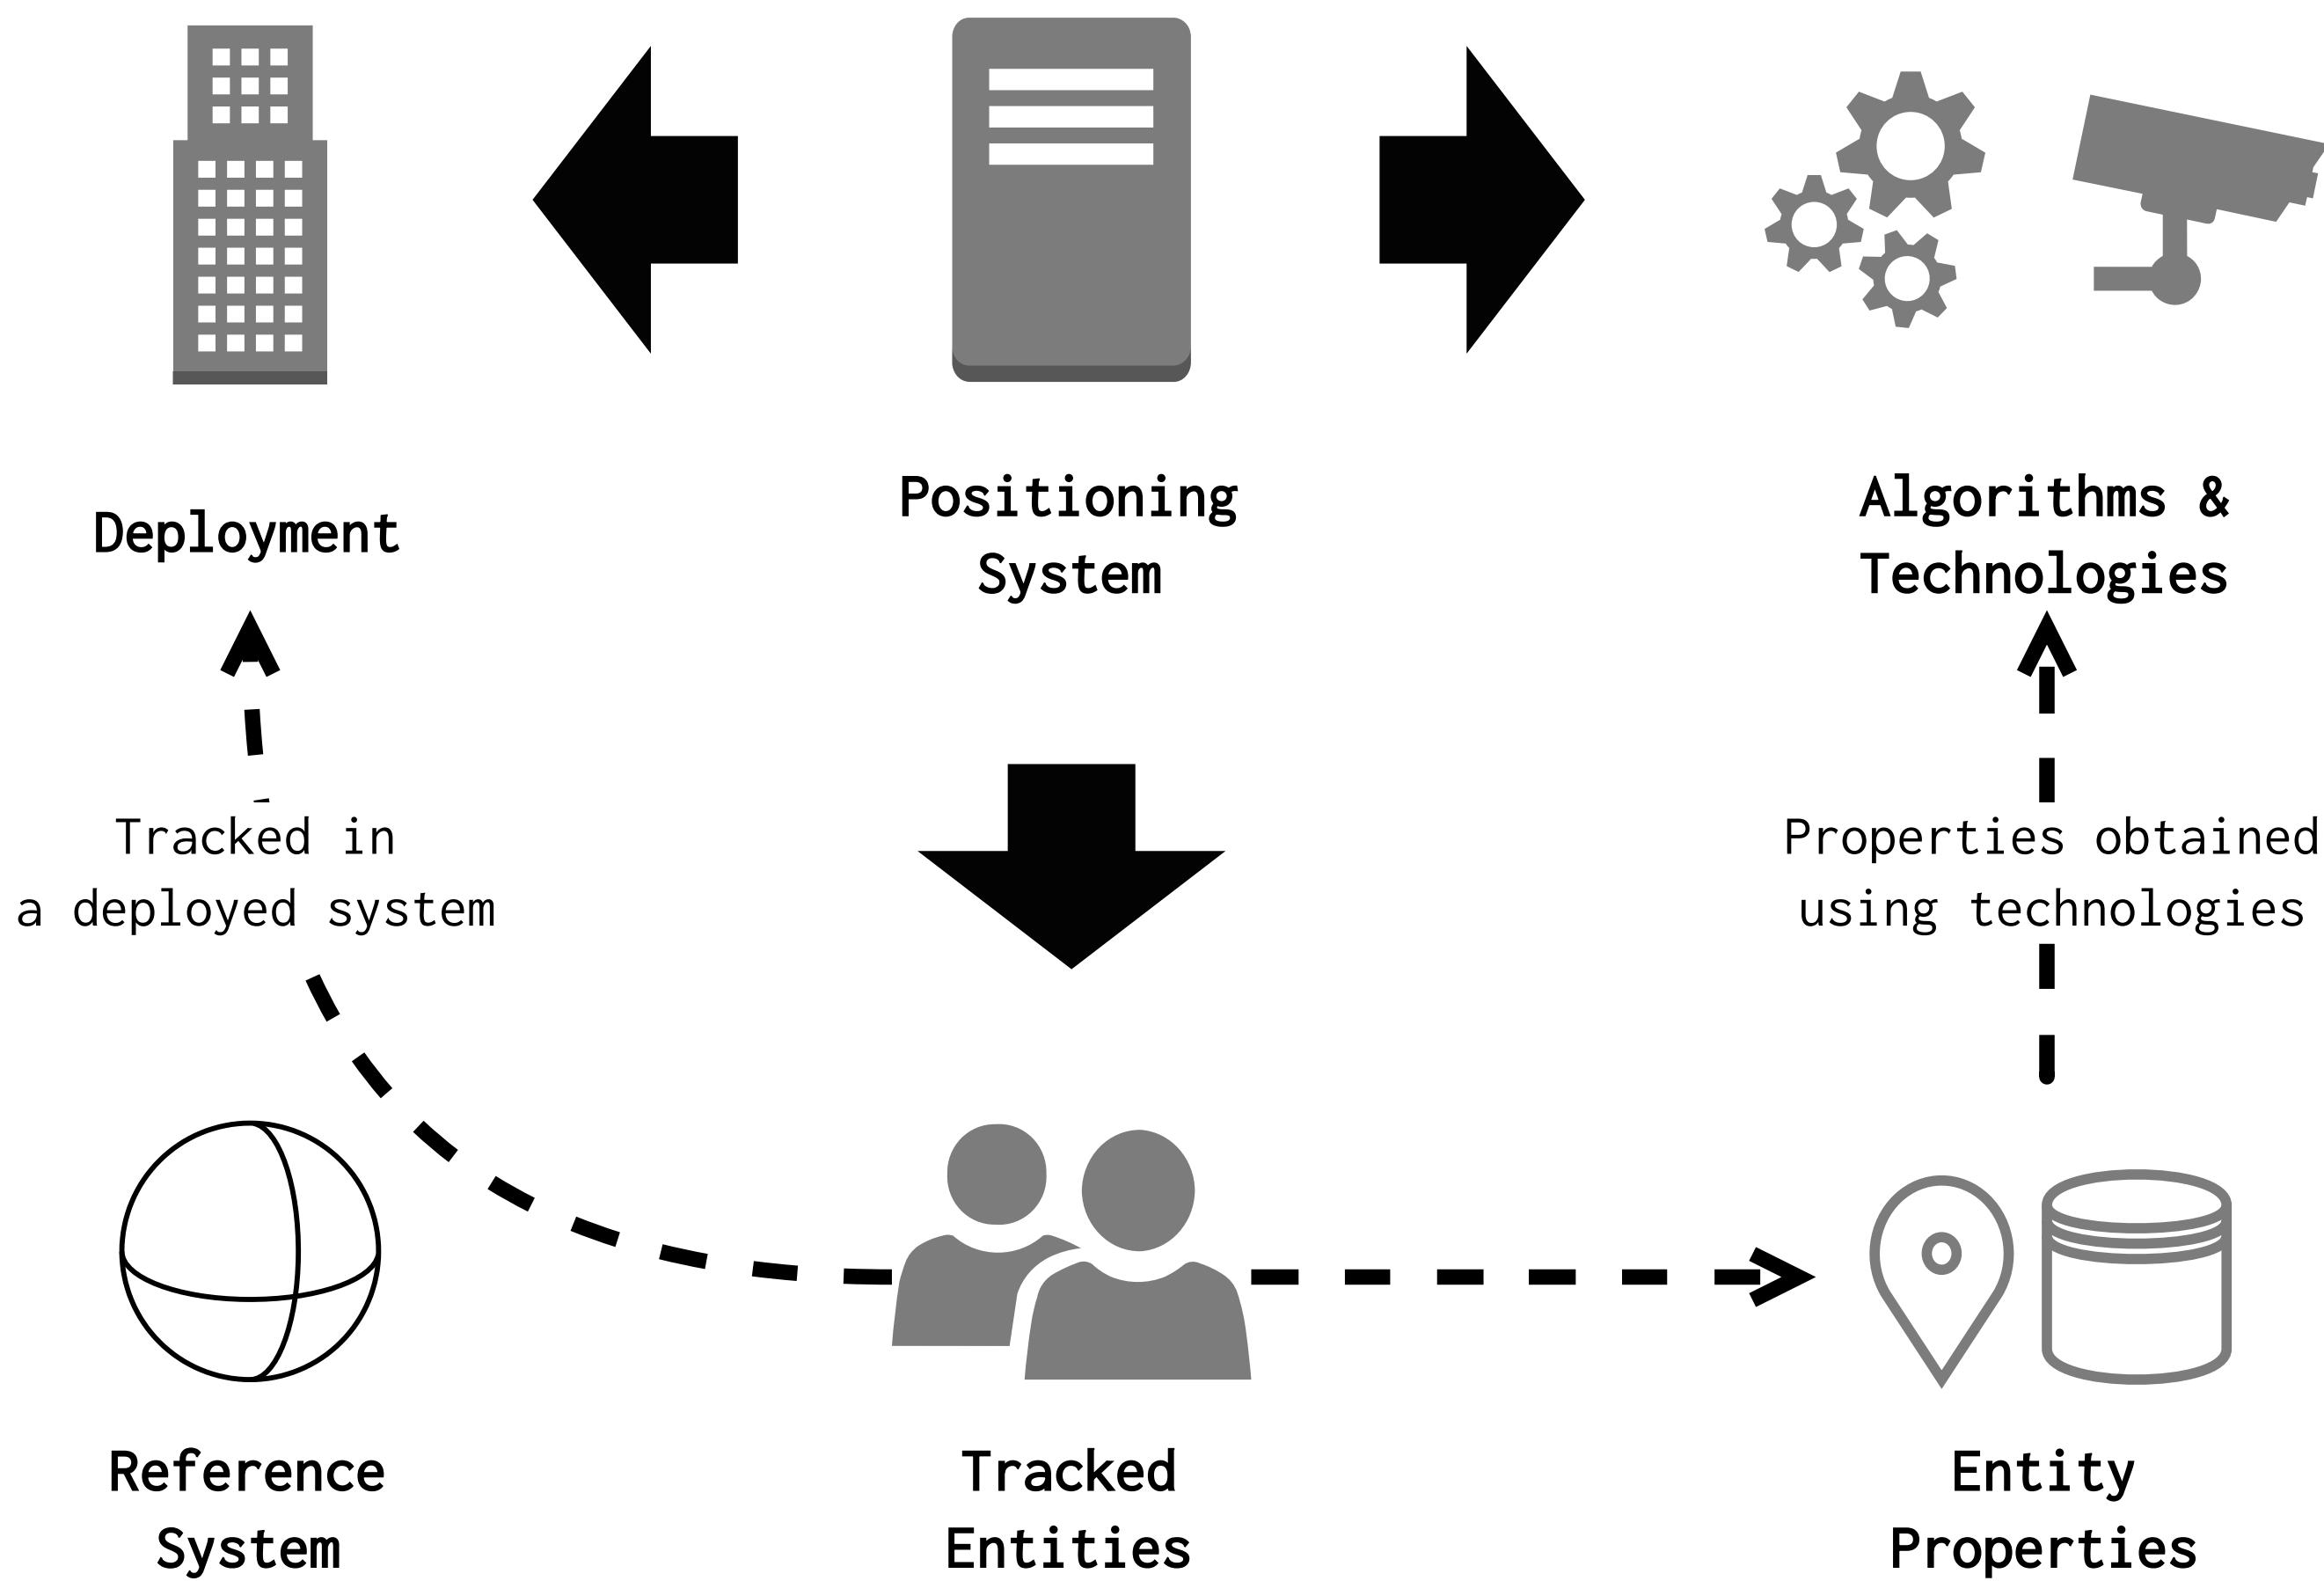

Location-based Services

Location-based Services ...

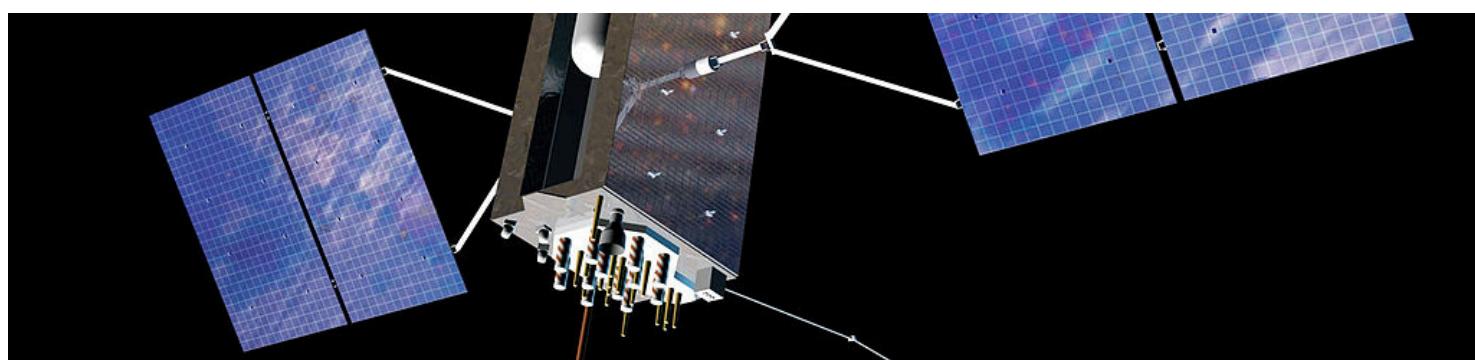

Positioning System

Positioning System ...

- ▶ Satellite positioning systems

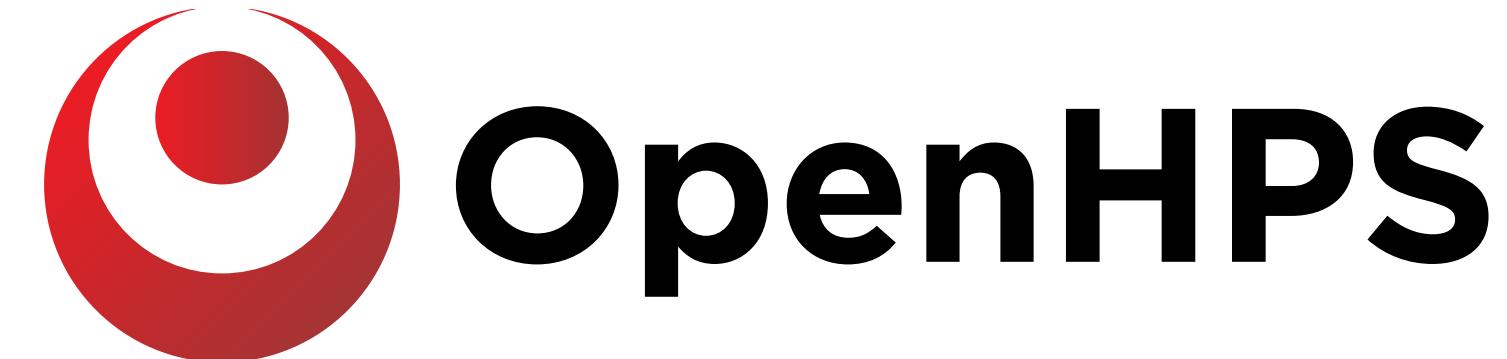

- ▶ Optical positioning systems

- ▶ Inertial positioning systems

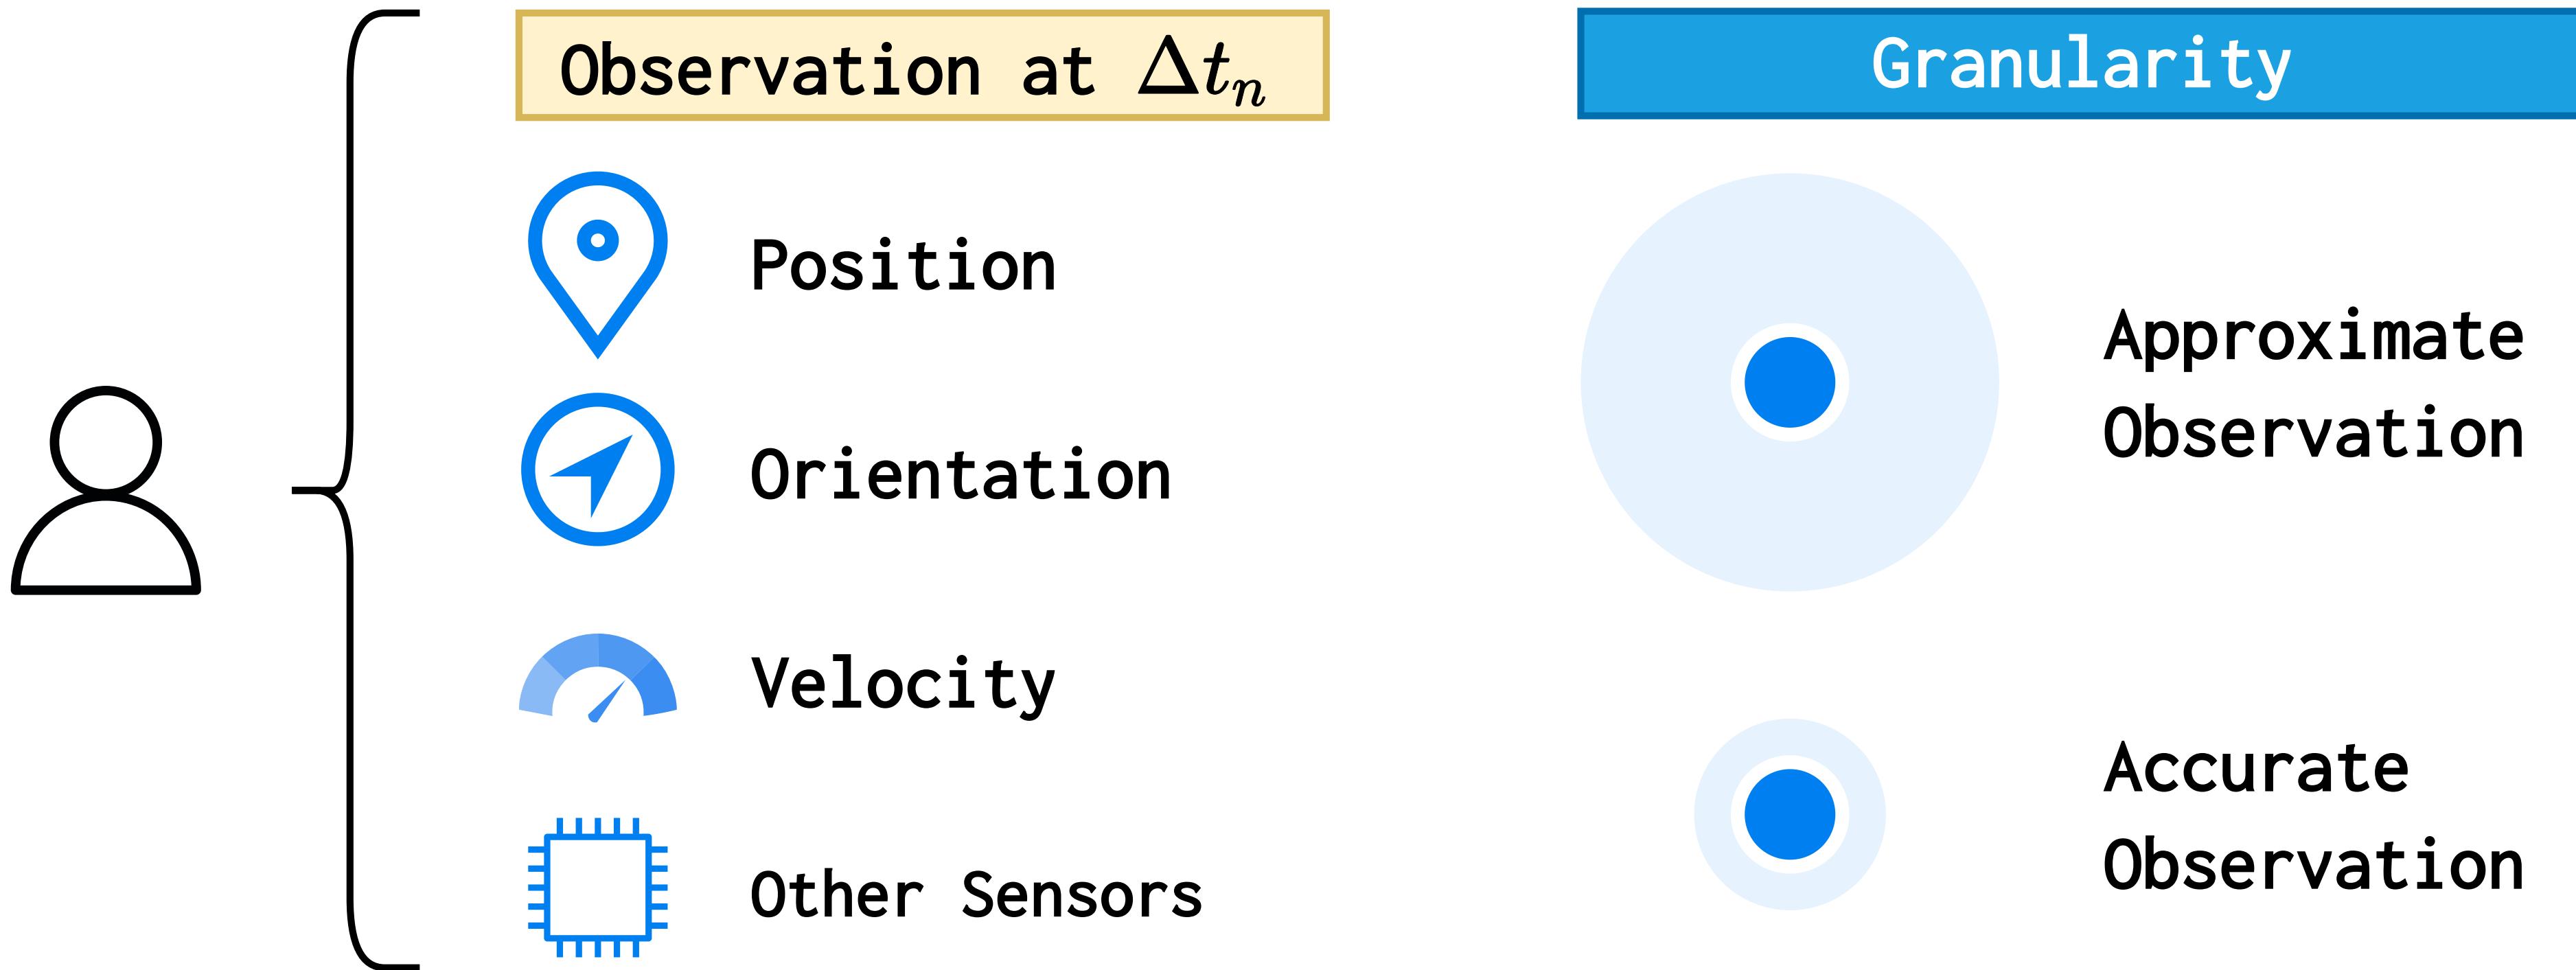

- ▶ Integrated positioning systems

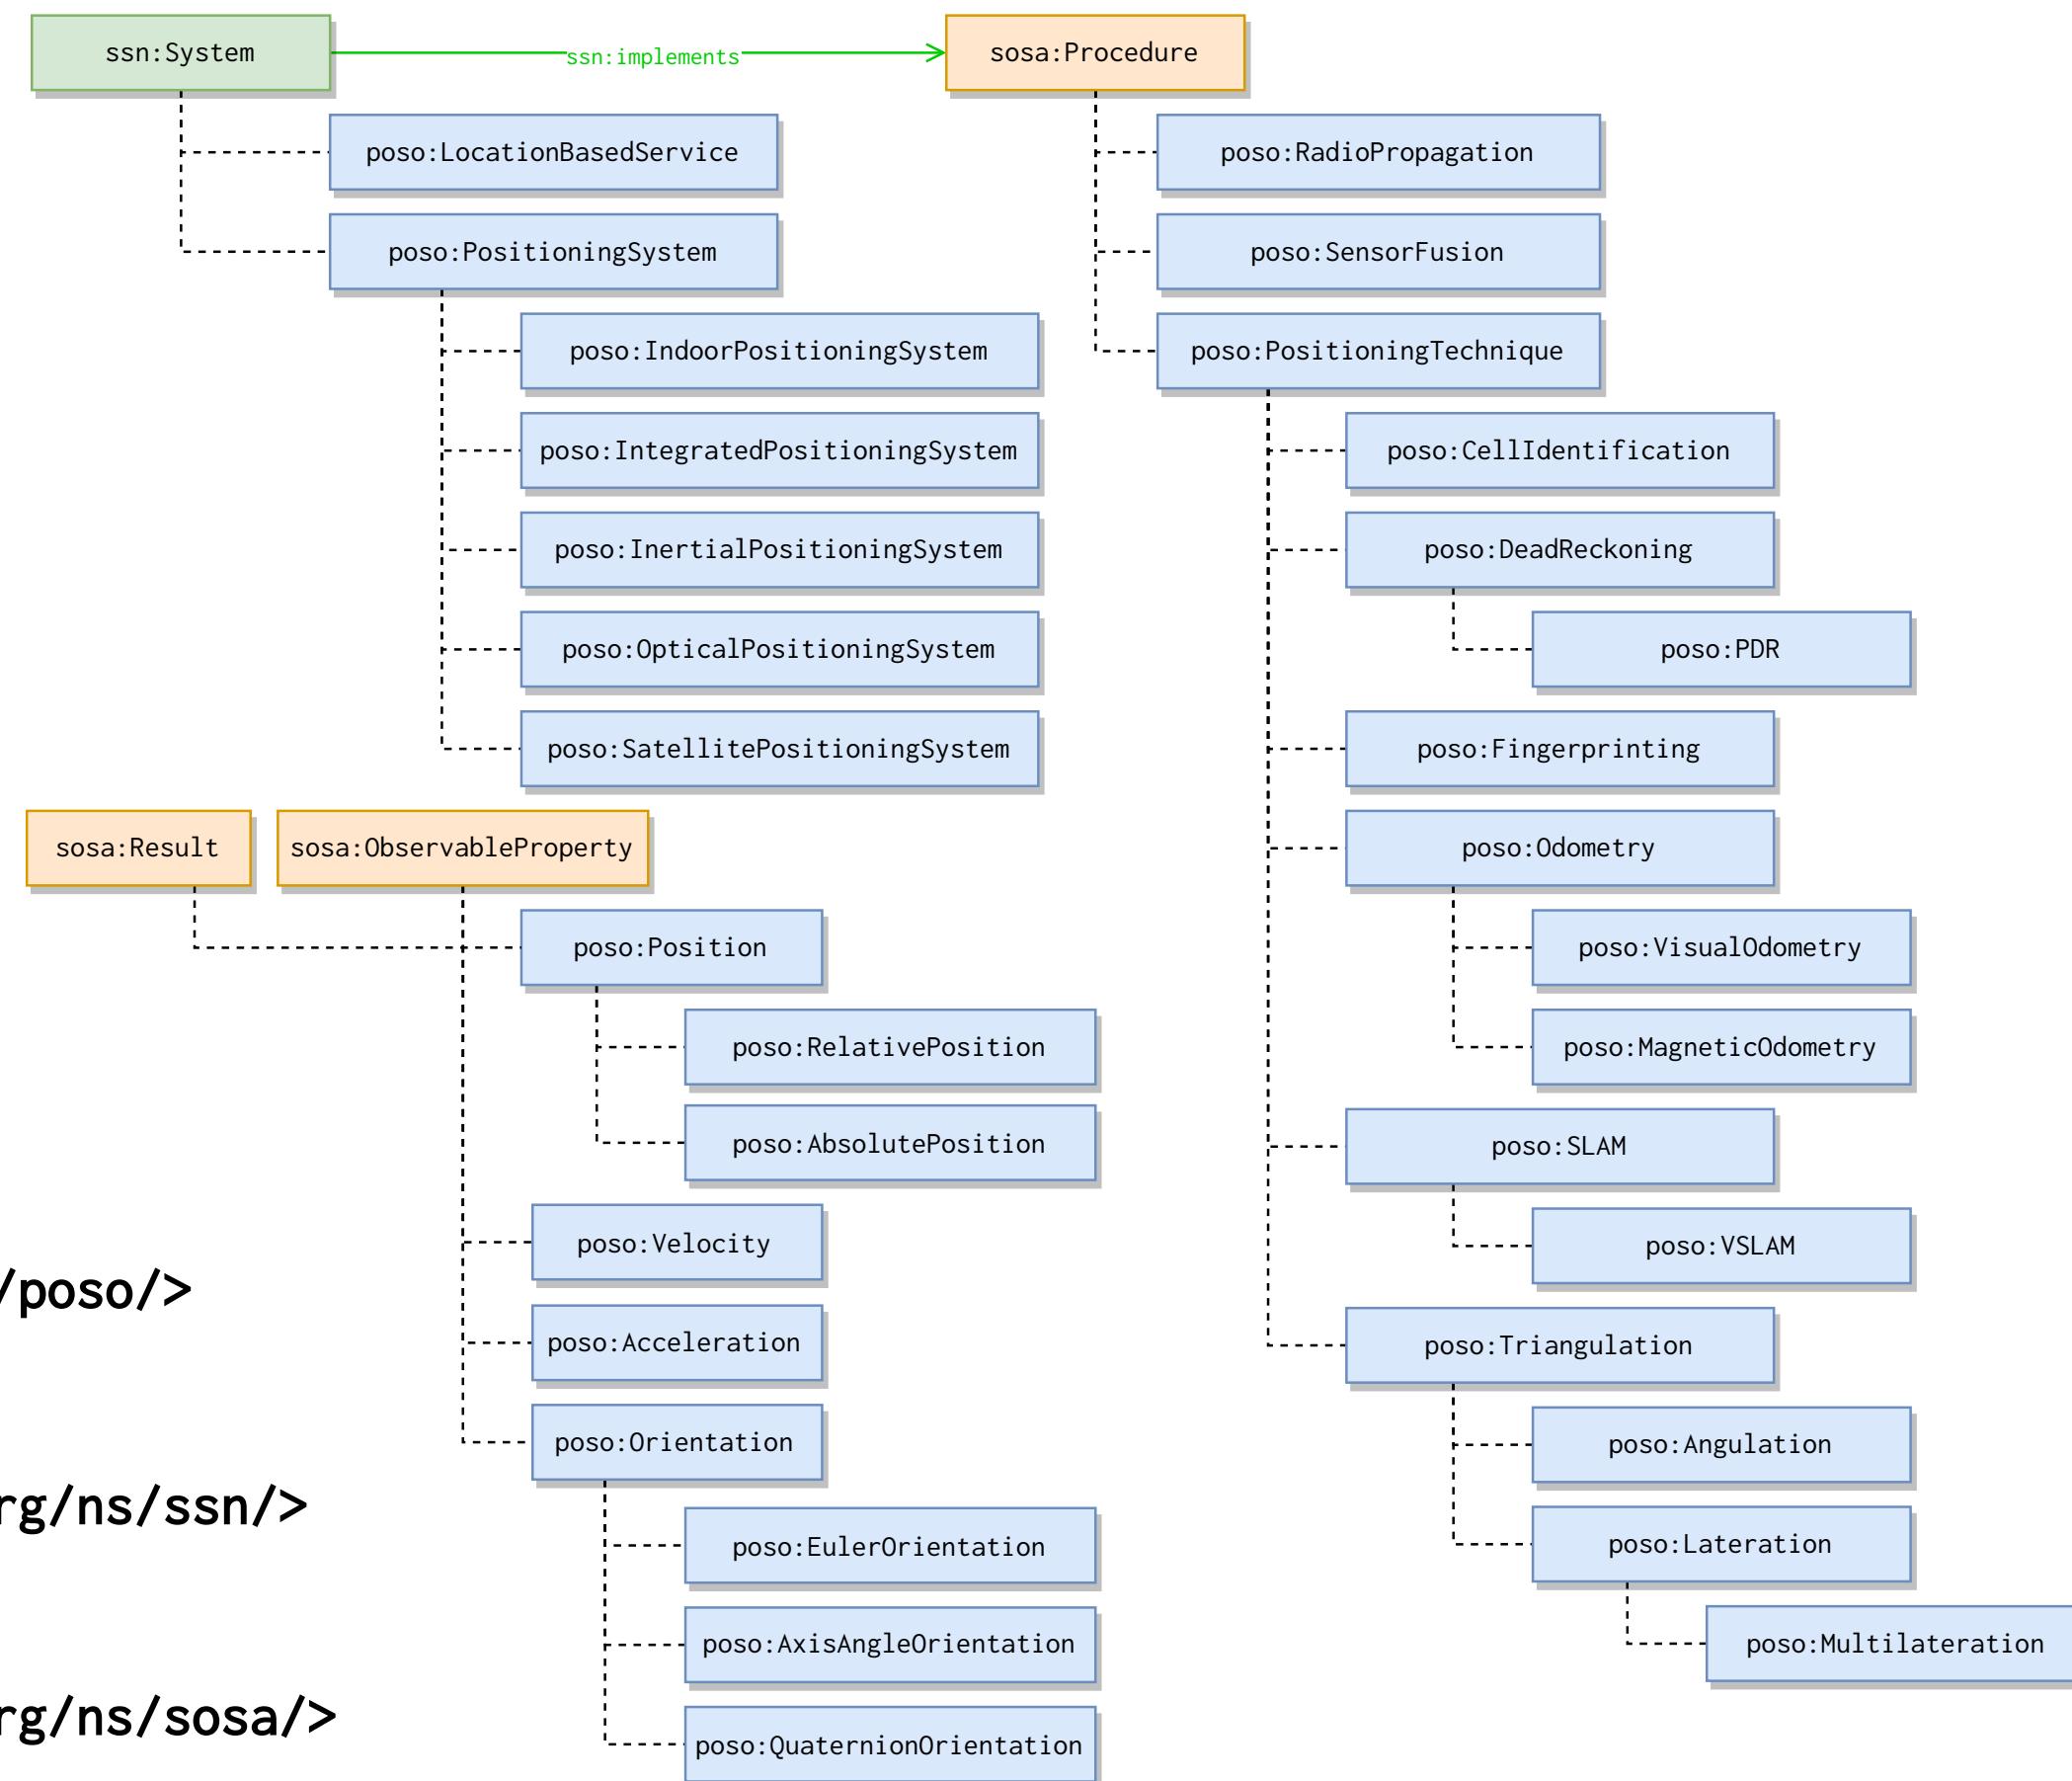

- ▶ Indoor positioning systems

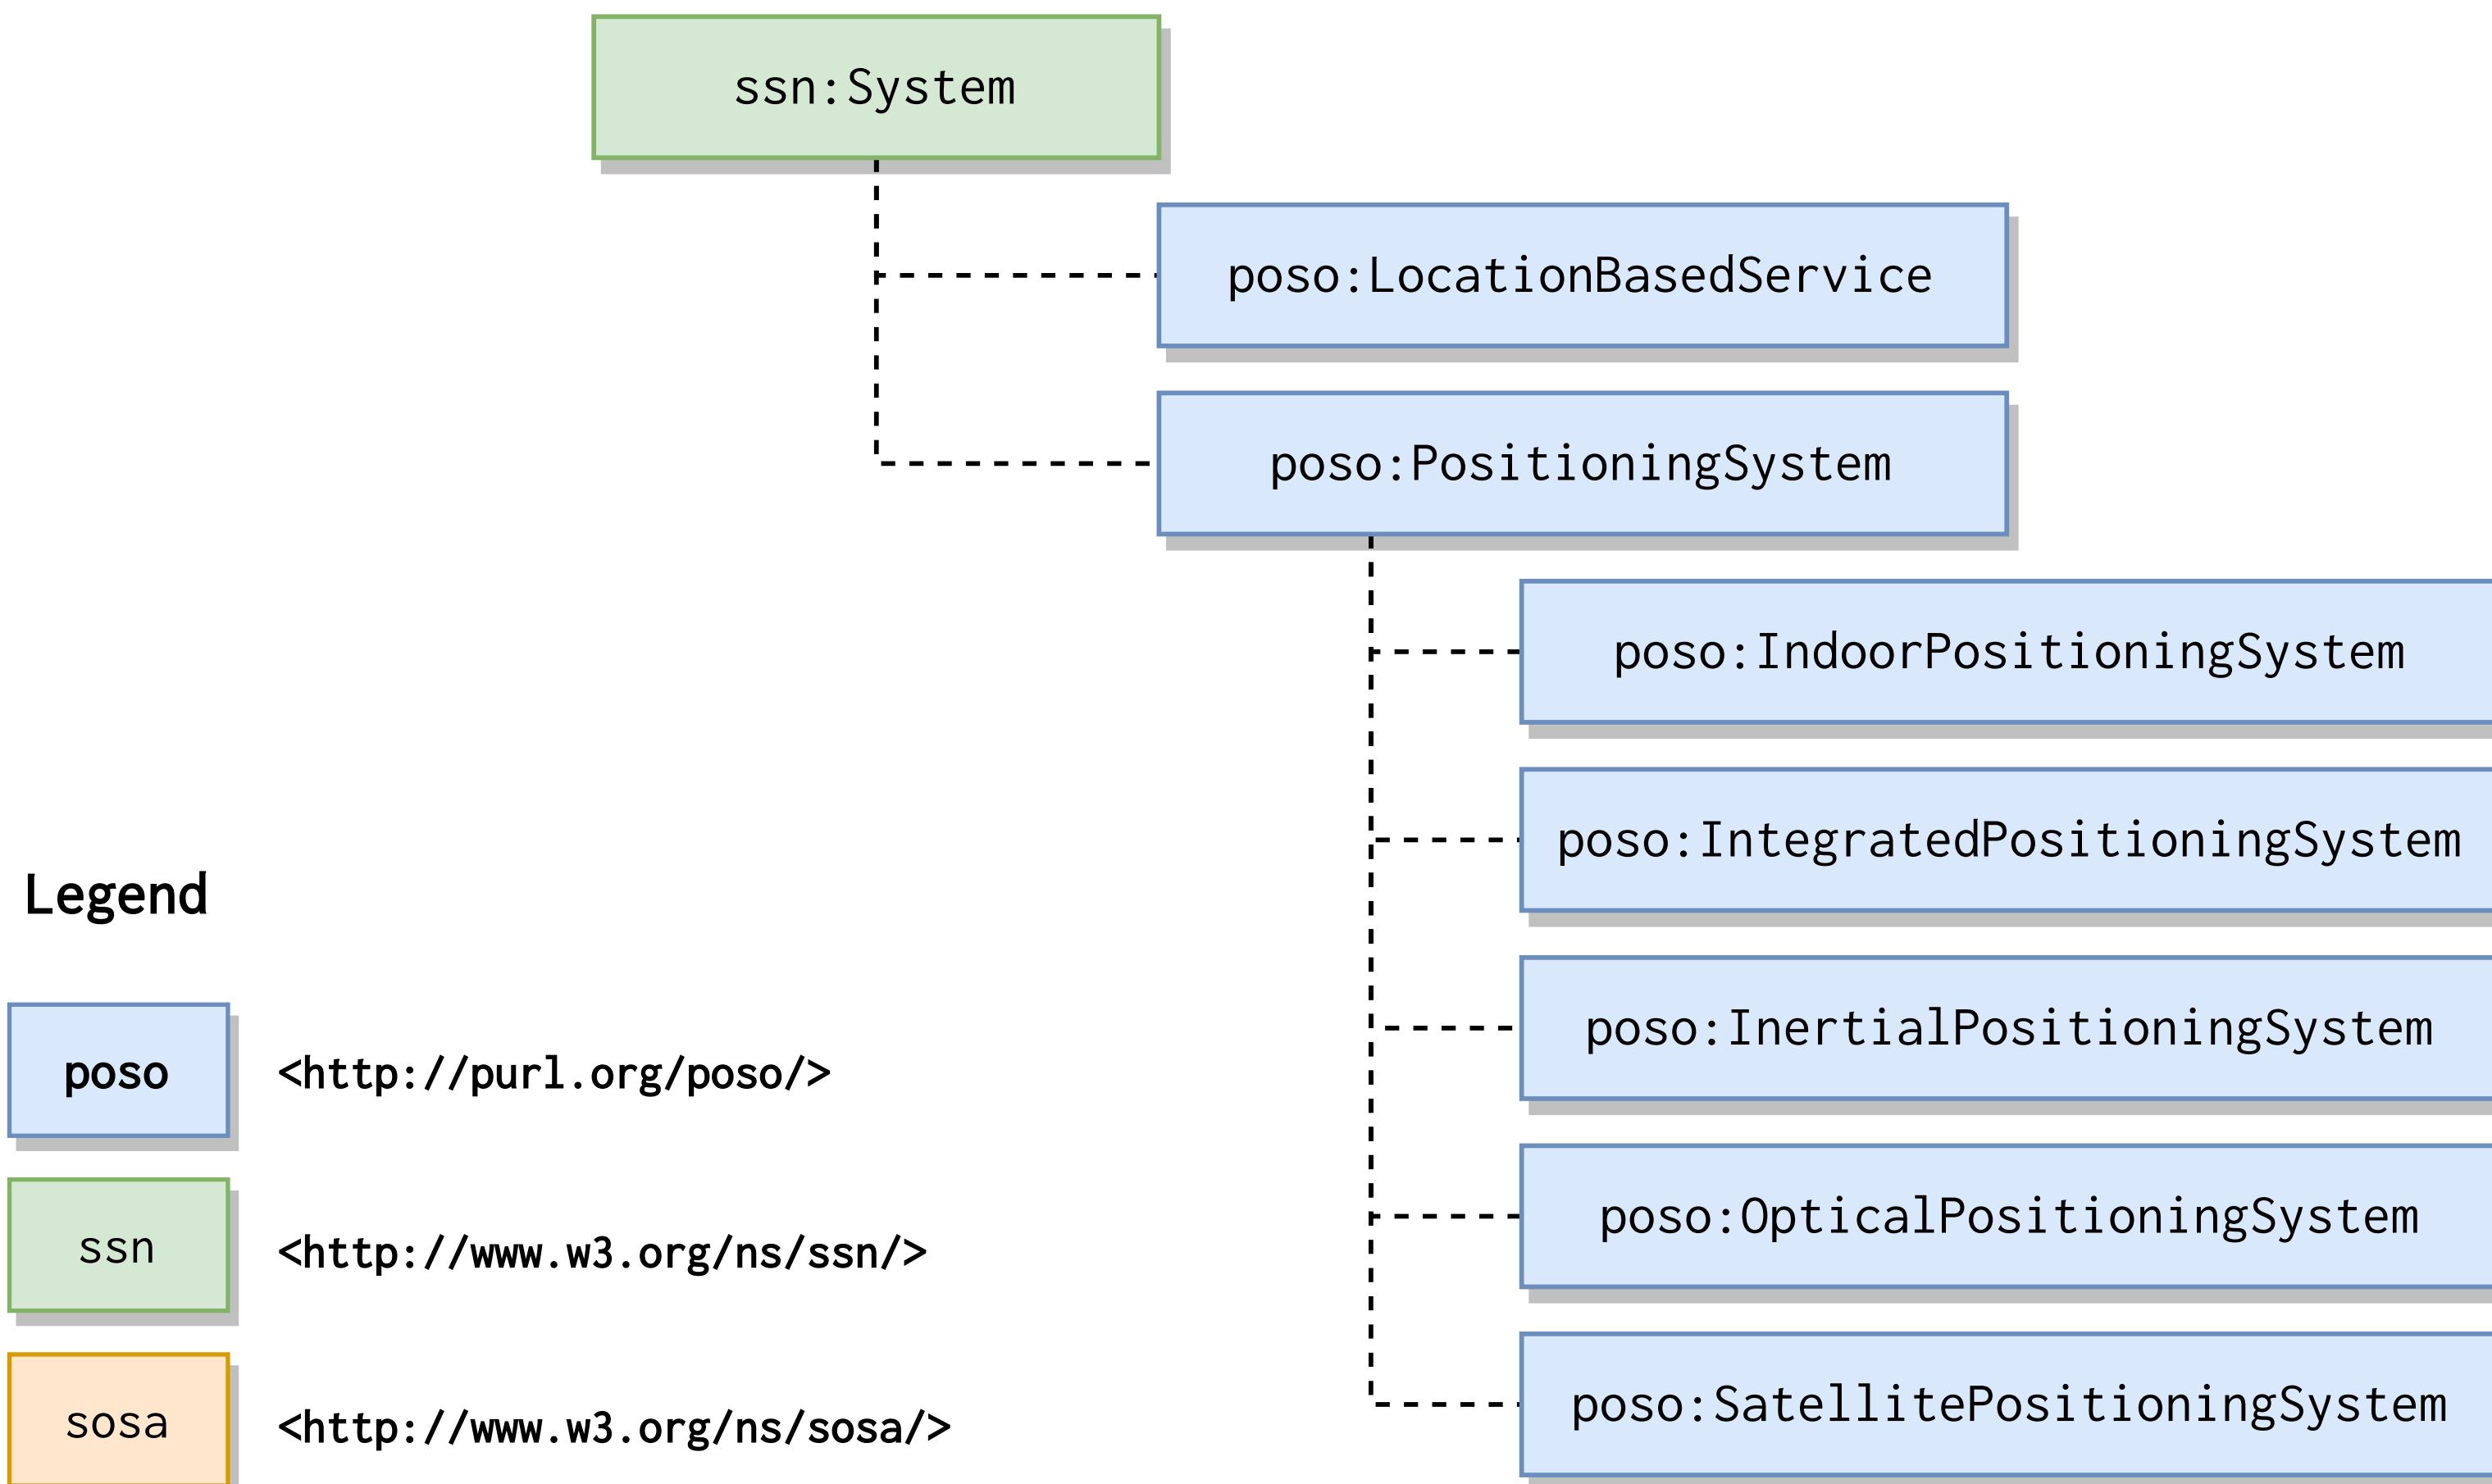

Tracked Entities and Their Properties

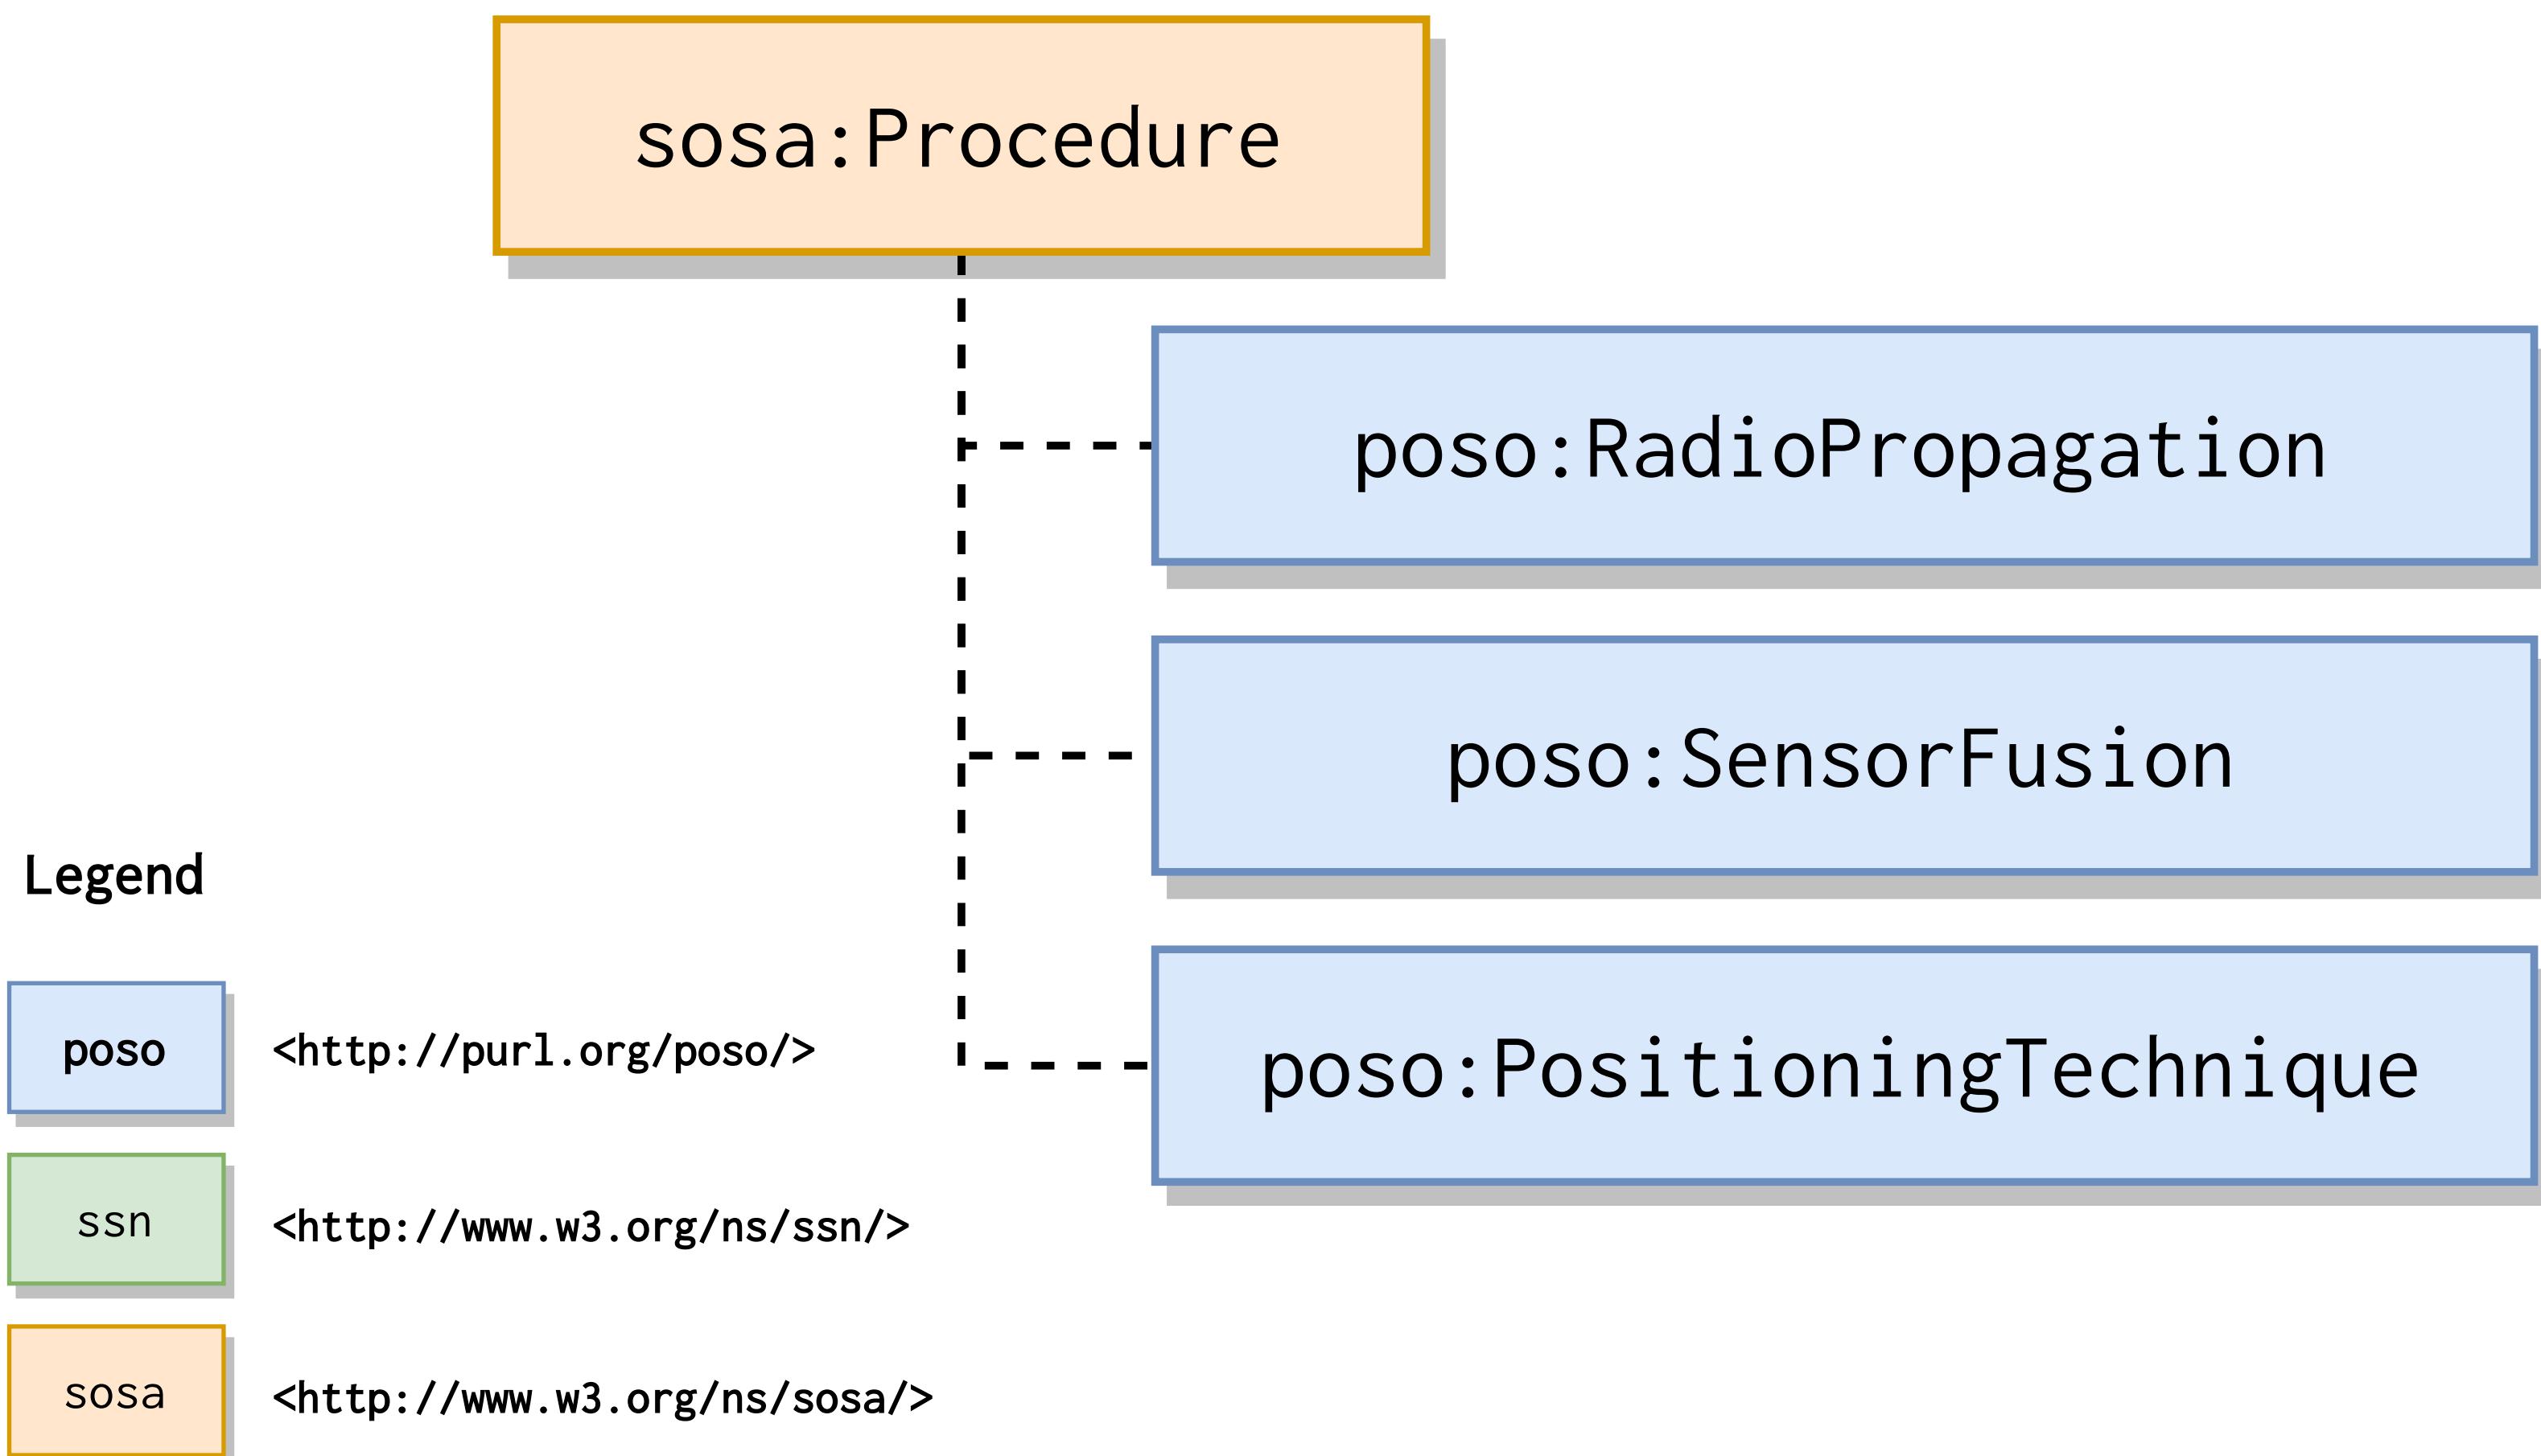

Ontology Design

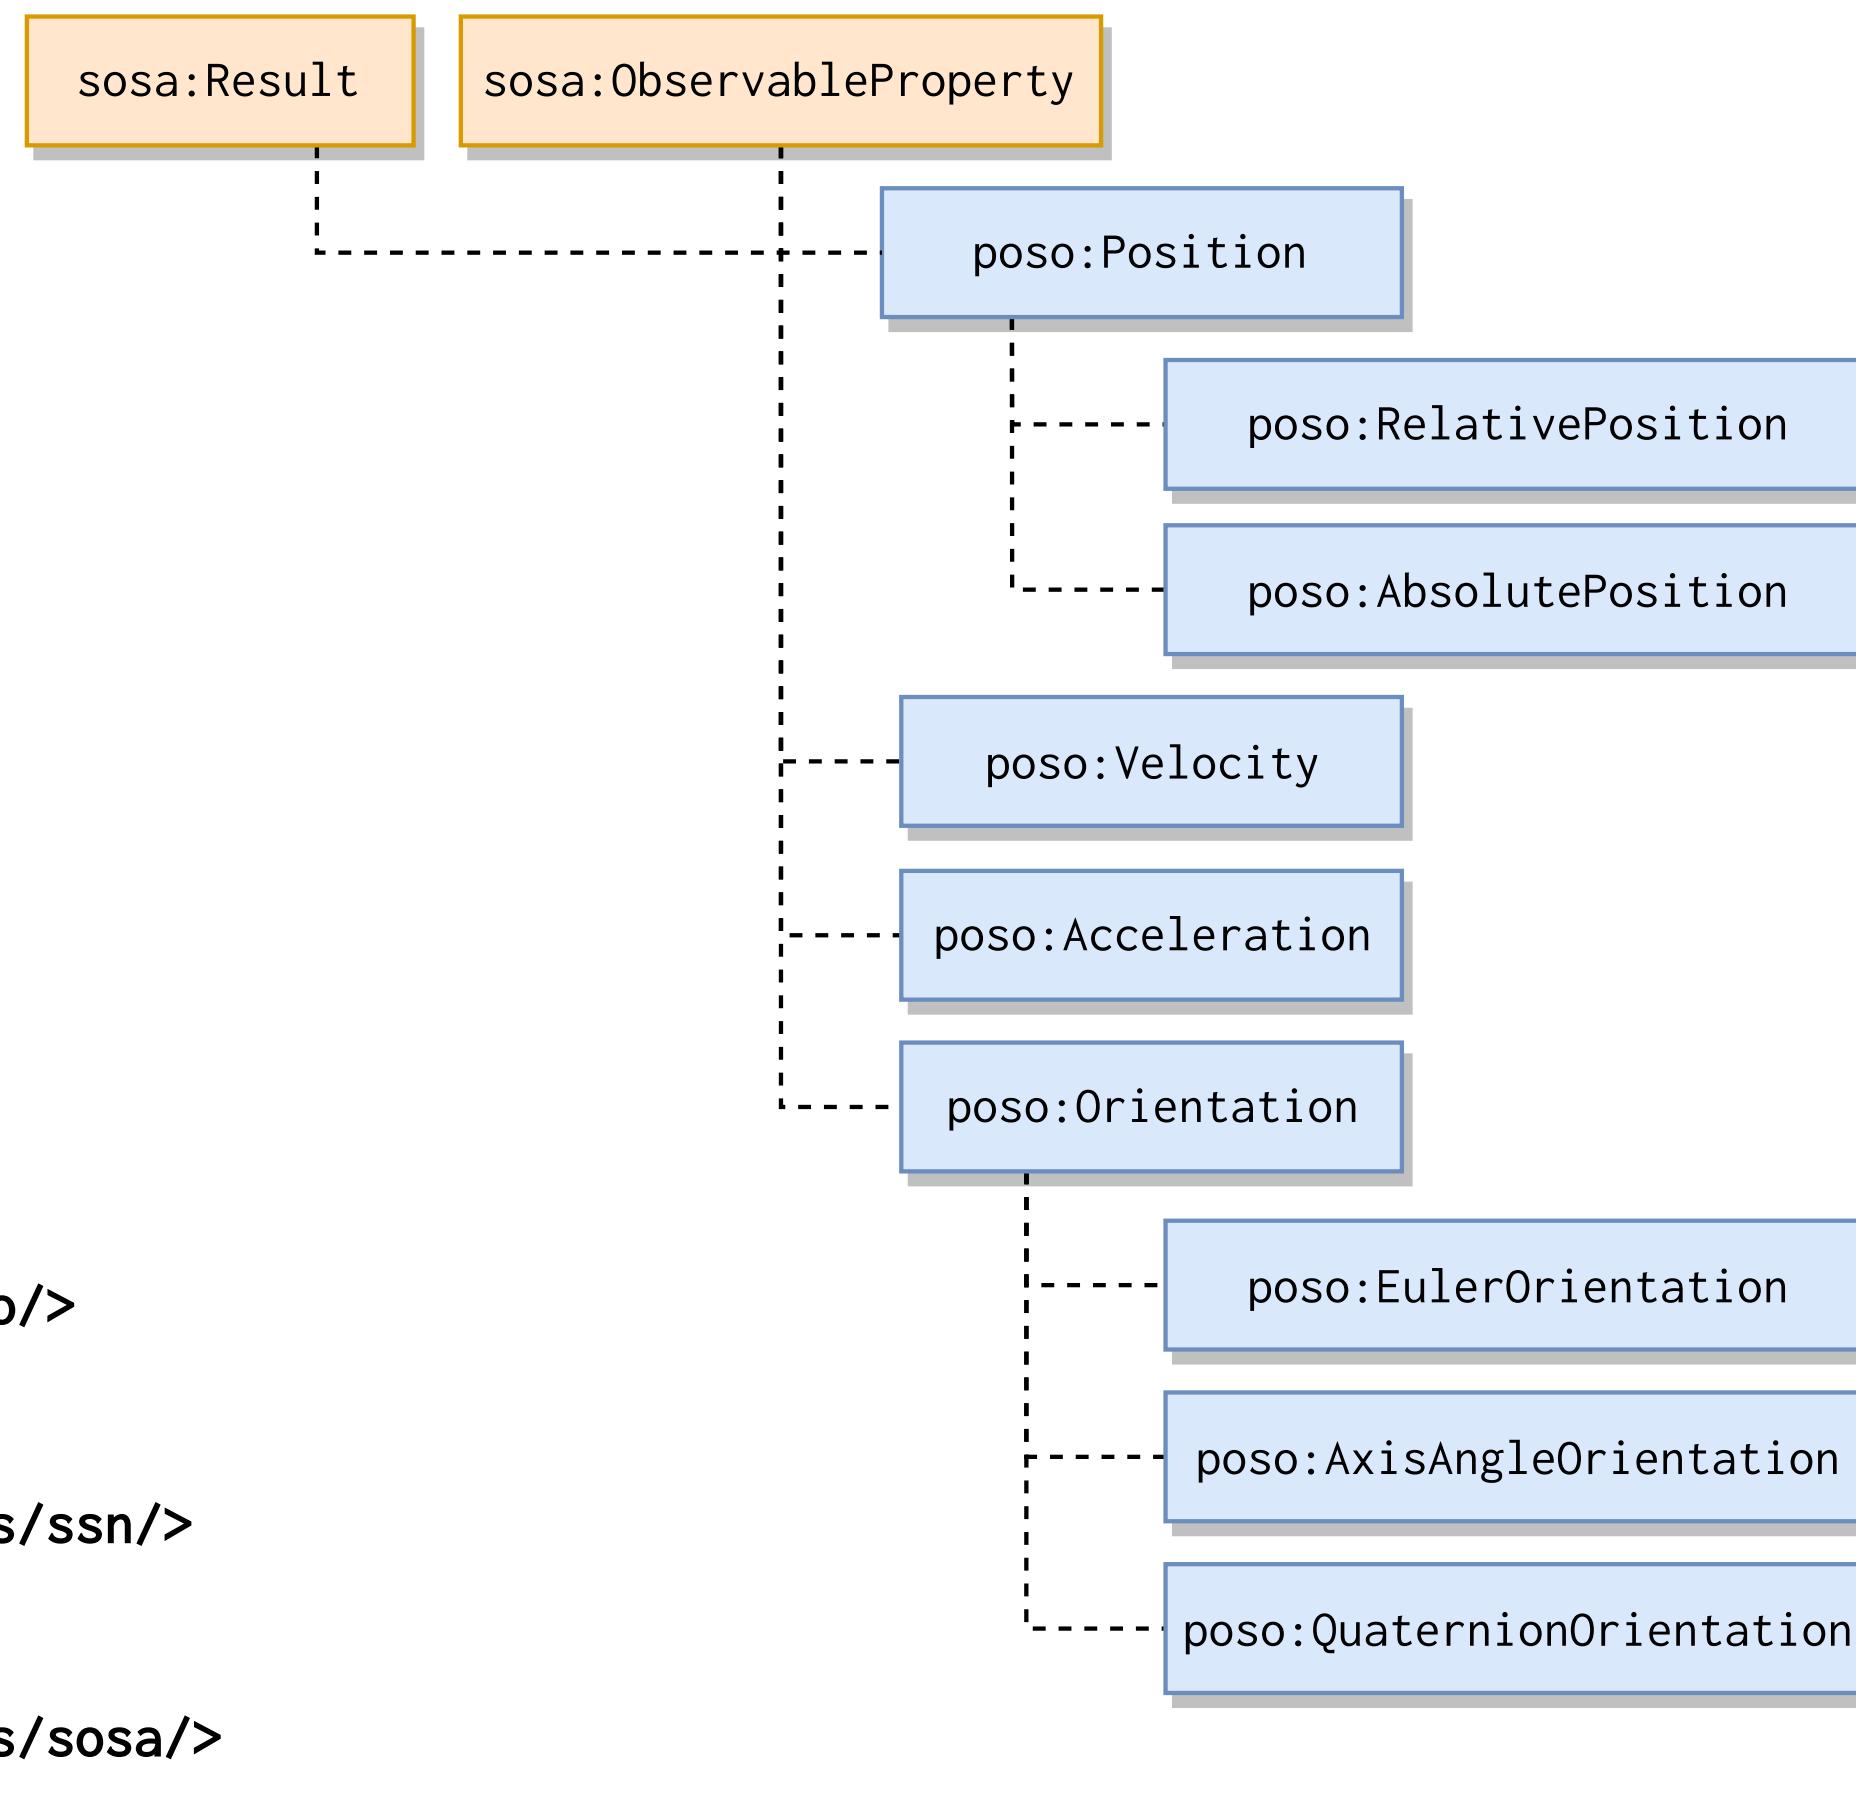

Ontology Design ...

POSO Common Module (posoc)

<http://purl.org/poso/common/>

- ▶ Adds common in-use positioning systems and location-based services
 - e.g. Global Positioning System, GeolocationAPI
- ▶ Adds common algorithm implementations
 - e.g. HectorSLAM, Trilateration, CSI fingerprinting
 - Adds graph shapes for algorithm input and output
- ▶ Adds common frameworks/platforms
 - e.g. IndoorAtlas, AnyPlace
- ▶ Adds common types of landmarks
 - e.g. iBeacon, Eddystone, AltBeacon

Usage

Positioning System

```
dbr:Some_University a ssn:Deployment .  
<deployment/building_a> a poso:IndoorDeployment, geosparql:Feature ;  
    rdfs:label "Building A"@en ;  
    geosparql:hasGeometry [  
        a geosparql:Geometry ;  
        geosparql:asWKT "...""^^geosparql:wktLiteral ] .  
  
<system/OPS> a poso:LocationBasedService ;  
    rdfs:label "Outdoor campus positioning"@en ;  
    ssn:hasSubSystem posoc:GPS ;  
    ssn:hasDeployment dbr:Some_University .  
<system/IPS> a poso:IndoorPositioningSystem ;  
    rdfs:label "Indoor campus positioning"@en ;  
    ssn:hasDeployment <deployment/building_a> ;  
    ssn:implements posoc:KNNFingerprinting .  
<system/CampusPositioning> a poso:IntegratedPositioningSystem ;  
    rdfs:label "Hybrid campus positioning system"@en ;  
    ssn:hasSubSystem <system/OPS>, <system/IPS> ;  
    ssn:implements posoc:WeightedAccuracyFusion .
```

Usage

Positioning System

```
dbr:Some_University a ssn:Deployment .

```

Conclusion and Future Work

- ▶ We presented the new **POSO** ontology
 - Describe positioning systems, their algorithms and technologies
 - Describe observations and the type of observation
- ▶ Additional poso-common module for common algorithms and systems
- ▶ Interoperability between positioning systems
- ▶ Future alignment modules for sensors and specific algorithms
